PROFESSIONAL SUMMARY

Motivated and detail-oriented MCA student with hands-on experience in full-stack web development and machine learning projects. Skilled in Java, JavaScript, Python, PHP Laravel, React, MySQL, and MongoDB. Passionate about building scalable applications, solving real-world problems, and learning new technologies.

EDUCATION

Master of Computer Applications (MCA)

Manipal Institute of Technology, Manipal

2024 – 2026

CGPA: 8.26

Bachelor of Science (Mathematics, Computer Science)

Mahatma Gandhi Memorial College, Udupi

2021 – 2024

CGPA: 9.5

PUC

Poornaprajna Pre-University College, Udupi

2019 – 2021

88.33%

SSLC

Karnataka Public School, Kokkarne

2019

84.5%

EXPERIENCE

Software Engineer Intern — Udupi Web Solutions (Remote)

Jan 2026 – May 2026

- Developed a **Construction CRM System** using **PHP Laravel, MySQL, JavaScript, HTML, and CSS**.
- Implemented role-based authentication, project and client management modules, and optimized database operations for improved system performance.
- Participated in requirement analysis, testing, debugging, and deployment while following MVC architecture and software development best practices.

SKILLS

Programming Languages

Java, JavaScript, Python, C++

Web Technologies

HTML, CSS, React, Node.js, Express.js, PHP Laravel

Database

MySQL, MongoDB

Concepts

OOP, DSA, DBMS, Operating Systems, REST API Development, JWT Authentication

Tools & Platforms

Git, GitHub, VS Code, Jest

PROJECTS

Student Performance Prediction System

Python, Flask, Scikit-learn, SQLite | [\[GitHub\]](#)

- Developed an AI-powered web application to predict students' final examination scores using academic factors such as study hours, attendance, previous scores, and assignment completion.
- Built an interactive analytics dashboard featuring prediction trends, score distribution charts, and historical prediction tracking.
- Implemented performance categorization, personalized study recommendations, search/filter functionality, and CSV export features.
- Designed a responsive dark-themed user interface with score gauges, feature contribution visualization, and real-time analytics.

Sweet Shop Management System

Node.js, Express.js, React, MongoDB | [\[GitHub\]](#)

- Developed a full-stack Sweet Shop Management System with secure user authentication and role-based access control using JWT.
- Built RESTful APIs and implemented inventory management with CRUD operations, sales processing, and stock management.
- Developed a responsive React-based user interface with search, filter, and real-time inventory updates.
- Followed Test-Driven Development (TDD) principles using Jest and Supertest to ensure application reliability.

Hospital Parking Management System

PHP, MySQL, HTML, CSS, JavaScript | [\[GitHub\]](#)

- Designed and implemented a full-stack web application for automating parking management operations.
- Developed features for vehicle entry, search, report generation, and parking category management.
- Improved operational efficiency through organized data handling and responsive design.

CERTIFICATIONS

- Responsive Website Basics: Code with HTML, CSS, and JavaScript – Coursera (Oct 2024)
- Linear Algebra for Machine Learning and Data Science – Coursera (Oct 2024)
- Introduction to MongoDB – Coursera (Mar 2025)
